PROFESSIONAL SUMMARY

Product Owner with 8 years of experience, including 4 years as a Product Owner and 4 years as a Quality Analyst, building and enhancing developer-focused platform products in agile environments. Experienced in defining product vision, owning execution, and prioritizing roadmaps for scalable software solutions. Strong collaborator with engineering and security-minded teams, enabling faster, high-quality delivery while maintaining strong standards for software quality, risk reduction, and customer trust.

EDUCATIONAL QUALIFICATION

- Bachelor of Engineering from JNTUH, Hyderabad in 2017.

WORK EXPERIENCE

Vitech
Hyderabad

April 2018 to March 2026

Product Owner

Product Ownership & Execution

- Defined and communicated product vision and roadmap aligned with business strategy and customer needs
- Owned the end-to-end product lifecycle, from ideation and requirements discovery to delivery and release
- Managed and prioritized the product backlog to maximize customer value and delivery efficiency
- Wrote clear, concise user stories and acceptance criteria, enabling secure, high-quality development
- Partnered closely with engineering, architecture, and QA teams to deliver scalable platform features

Agile & Cross-Functional Leadership

- Led sprint planning, backlog refinement, reviews, and retrospectives in a SAFe Agile environment
- Actively participated in PI Planning, dependency management, and release coordination
- Identified delivery risks and roadblocks early and worked proactively to remove impediments
- Collaborated with Scrum Masters to ensure predictable and efficient sprint execution

Customer & Data-Driven Focus

- Worked closely with stakeholders and end users to understand pain points and translate them into actionable product requirements
- Used delivery outcomes, feedback, and performance trends to continuously refine backlog priorities
- Enabled faster turnaround of customer requests by improving backlog readiness and decision-making

Key Achievements

- Accelerated delivery of high-priority customer features through improved backlog prioritization
- Improved sprint predictability and release confidence across teams
- Reduced rework and defects by strengthening acceptance criteria and early collaboration

Certifications

- SAFe Product Owner / Product Manager (PM/PO)
- SAFe Scrum Master

Quality Analyst

Roles & Responsibilities:

- Analyzed business and functional requirements to ensure test coverage
- Designed and executed test cases, test scenarios, and defect tracking
- Collaborated with Product Owners and developers to clarify requirements
- Supported UAT cycles and production releases
- Identified process gaps and contributed to quality improvements

Key achievements

- Improved defect detection in early stages
- Supported stable releases through effective QA practices

Tools

- Jira
- Confluence
- Miro

KEY SKILLS & QUALITIES

- Product Vision & Roadmap Ownership
- Developer-Focused Platform Products
- Agile & SAFe Delivery
- Backlog Prioritization & Execution
- User Stories & Acceptance Criteria
- Cross-Functional Collaboration
- Software Quality & Risk Reduction
- Customer-Centric Product Development
- Continuous Improvement
